I managed to get a game started~ I joined the original server. I just got in character, My name is Wotage(lol) Its hard to write German, but im getting there... Anyway I have a small question (Gotta start somewhere) - I'm storyboarding, Custom mapmaking, and level design and programming on it at the moment WTF I really like the combat system the use of runes and motion to control attacks and that kind of stuff, what do you people think about customize attacks, spells, weapons, armor etc. Not being literate in AS3 I am a little upset with the amount of time it takes to make it do what I want it do, also I know it can be faster for a experienced character designer. The combat system is classic, move in different ways a different way basic hack n slash I don't see your customizations will be needed. Your actually gonna try this right? Untill we find out what your trying to do we can't really help you, Other then help you research. We need to know what you can attack and what can you defend against. If you can make your own weapon just tell us you are making your own weapon and then we can say what you can do with it,
