In progeCAD 2019, General Settings/All Effects have been slightly redesigned, the sub-menus of the new context-sensitive contextual help are now reset to defaults, the toolbar no longer supports shape snaps and the contextual help is now context-sensitive. Learn how to change General Settings, create or modify objects, edit mtext properties, transform objects and rotate/scale objects in progeCAD 2019. Navigating in progeCAD's menus has been improved (the toolbar functions can now also be easily customized by executing progeCAD's Advanced Settings dialog), the search dialog now works efficiently when using Internet Explorer, and, for the first time, the progeCAD path is used to select the desktop image and/or the working area when using the File menu. Several additional improvements can be found in progeCAD's dialogs: The Options dialogs are now save-as-saved, the dialogs for adding or removing blocks and the scene windows have a new and improved design, the CAD mode has been added to the Options dialog and the Drawing and Scene's Properties window share a new and improved design. ProgeCAD Professional 2019 offers compatibility with the latest AutoCAD models. Because it automatically updates its files and its users do not have to worry about compatibility issues or file format changes. The document control mechanism allows users to integrate the latest master formats and templates of the old models into the editing workspace. New templates and master formats increase the productivity of progeCAD users. Import and export DXF files with the latest CAD formats. Because progeCAD can work with the latest master formats and templates of the older CAD models, the compatibility of the software with the latest masters is guaranteed.
