A lot of reviewers on Metacritic think that the game is too easy, and while there's a fair point to that, I've found the combat mechanics to be fun and challenging, without having to worry about a particular strategy to beat the game. For context, I played the first 6 levels for free via Instant Action before buying the game. I've played the full game twice and I've beaten it once already. A few different weapons, artifacts, and abilities are scattered around the town, and although most of them are just random drops rather than a specific level-up or anything like that, there is a character-building element to the exploration.
